Eco-sustainable transport operator

THE NEED. Improve the energy efficiency of companies and reduce their environmental impact.

THE SOLUTION. Gas2Move, operator of ecological and sustainable transport, makes its green fleet available to its customers.

- 1) Transformation aimed at the positive evolution of people management in the sector.
- 2) Innovation of the current paradigm of the sector, migrating to a scenario where the "customer centric" vision prevails.
- 3) Promotion of a sustainable eco-mobility model with all our vehicles powered by alternative energies (natural gas, hydrogen...).

KEY FEATURES.

- Access to city centers at any time.
- All vehicles powered by natural gas.
- Incorporation of new distribution models.

VALUE PROPOSITION.

- Autonomous car risk: percentage of personnel by TEA to reduce labour liabilities.
- Decreases the environmental impact of companies.
- Improves the energy efficiency of companies.
- Increase of green perception.
- Modernisation.
- Money savings.
