An innovative low-cost and convenient compressed natural gas home refuelling appliance

THE NEED.

The barrier to a rapid NGV adoption is the lack of fuelling infrastructure and a poor perception of NGVs versus trendy EVs.

THE SOLUTION.

HYGEN brings to the market a low cost supercharger that can fuel your Natural Gas Vehicle at home in just three minutes and transform the outdated NGV image into an appealing and modern EV like concept.

KEY FEATURES.

- Household design.
- Low electricity consumption.
- Low noise level.
- Fast at-home refuelling in around 3 mins.

VALUE PROPOSITION.

- Decrease fuel costs and increased convenience for the driver.
- Increase gas consumption and regulated asset base for gas companies.
- Reduce total cost of ownership of at-home refueller by a factor of 6.
